SUMMARY

Full stack engineer based in Indonesia, building web applications and backend systems since 2018. Skilled across the stack with hands-on experience in Go, JavaScript/TypeScript, and PHP/Laravel, with a strong track record of leading system migrations, improving performance, and delivering client-facing features from the ground up. Known for writing clean, maintainable code and collaborating closely with cross-functional teams to ship production-ready solutions.

EXPERIENCE

Full Stack Engineer Lima Bean	May 2024 – Present
• Led the migration of a legacy backend system to Go, improving performance and concurrent processing. • Owned the Template Builder module end-to-end for the Sportsman's Warehouse e-commerce redesign. • Designed checkout and shipping logic, including Click & Collect fee handling, for a high-traffic platform. • Restructured data and business logic to improve long-term maintainability and testability. • Standardized application configuration across local, testing, and production environments.	
Analyst Programmer (Software Engineer) AutoWealth	Jan 2022 – Feb 2024
• Led a revamp of the company's main website, improving data-loading performance by up to 50%. • Built a reusable template system that significantly accelerated client onboarding. • Developed and maintained front-end and back-end systems for responsive, reliable user experiences. • Conducted code reviews and mentored teammates to raise code quality and consistency. • Partnered with cross-functional teams to design and deliver product features.	
Back End Engineer Northbit.id (Freelance)	Jan 2023 – Dec 2024
• Designed backend architecture and system structure for client projects. • Built maintainable backend services using clean coding practices. • Designed database schemas and relationships to support scalable data structures. • Conducted code reviews to keep shared codebases clear and maintainable.	
Back End Web Developer Genesys Integrated Indonesia	Oct 2020 – Nov 2021
• Developed scalable web applications, primarily point-of-sale systems. • Built multi-level-marketing applications supporting users, transactions, and integrated payments. • Optimized complex database queries and resolved performance issues before release.	

EXPERIENCE (CONTINUED)

Web Developer | Lembah Indah Hotel & Resort (Freelance)

Aug 2020 – Nov 2020

- Built the company website and lodging system from analysis and design through deployment.
- Responded quickly to client issues to maintain a smooth and reliable experience.

Software Engineer Intern | Brawijaya University Hospital

Jun 2018 – Aug 2018

- Contributed across the company website lifecycle, from analysis and design through deployment and support.
- Built scalable solutions that improved user experience and supported business growth.
